

Undated Form Revision List

When tax forms have the year printed at the top, it is easy to know if you have the latest version of the that form. However, when the form does not have the year printed on it, known as undated forms, it is not as simple. Periodically, the Government will release updated versions of these forms. Therefore, it is important to know the latest available revision for a given form. The revision date of a printed from is either shown near the top or at the bottom. Use the chart below to determine if you have the latest version of the form, or if you need to buy updated forms.

NEW	Form	Latest Revision Date
	1098	April 2025
	3921	April 2025
	1098-C	April 2025
